

Fortify

Plan Overview

Plan Description

Infolock's Fortify Plan is a managed Data Security Posture Management (DSPM) service. This offering is designed to enhance an organization's data security capabilities without the complexity and overhead of managing tools, processes, or resources internally. This fully managed service includes the deployment, management, maintenance, & operational administration of the DSPM solution.

Infolock's Fortify Plan ensures that sensitive data is discovered, classified, and continuously monitored – both in the cloud and in hybrid environments – against external and internal threat vectors, bad actors, accidental loss, and malicious compromise, fortifying the organization's data security posture over the long term.

Fortify Plan

Annual Subscription

Why Choose the Fortify Plan?

Challenges

- ! Unsure where the organization's most important data resides
- ! Lack a full inventory across the organization's digital estate, complete with data context
- ! Lack visibility into organization's internal and external data access, including where access may be over-permissive or out-of-date

Benefits

- ✓ Fully catalog and understand duplicate, stale, or sensitive data assets across the data estate
- ✓ Provide comprehensive data context, enabling teams to make informed decisions regarding access, sharing, and collaboration
- ✓ Establish who has access to the organization's data and why (what is their intent)?

Outcomes

- ↑ Autonomously discover sensitive data without tuning rules or detection
- ↑ Fully enable and support DLP controls with data classification and access governance insights
- ↑ Support Zero Trust / SASE architectures with a "data-first" foundation

About Infolock

Founded in 2005, Infolock is the go-to data risk management advisory, consulting, and managed services firm for security conscious organizations. With a programmatic approach, Infolock expertly manages the complex data risks of its clients, enabling organizations to achieve their strategic business objectives. Named among the "Fastest Growing Companies" on Inc. Magazine's "Inc. 5000" list, Infolock developed DataRAMP™, a data risk management framework which empowers organizations to understand and manage data risk in the same manner as other organizational risks, such as financial, competitive, and regulatory risk. Headquartered in Arlington, VA, Infolock serves customers in the financial services, healthcare, government, educational and other highly-regulated industries around the world.
