

Increase Data Protection and Maximize Value with Spirion and Infolock

Managed DSPM Offering

Leverage the best of both worlds with Spirion's advanced data governance technology seamlessly integrated with Infolock's expert managed services. This partnership simplifies your organization's complex data security management, making it more accessible and effective with five key benefits:

- 1. Enhanced Data Protection:** Gain unparalleled protection with Spirion's robust data discovery and classification capabilities, enhanced by Infolock's ongoing management and optimization.
- 2. Reduced Operational Overhead:** Free your internal teams from the burdens of daily security management. Infolock's managed services handle the heavy lifting— from maintenance to administration—allowing your staff to focus on core business initiatives.
- 3. Continuous Compliance:** Stay ahead of regulatory requirements with a managed DSPM plan that continuously adapts to changes in compliance landscapes. Spirion's technology combined with Infolock's expertise aligns your data security efforts with industry standards and best practices.
- 4. Data Visibility and Control:** Transform how you manage data with comprehensive visibility and control over every piece of sensitive information. This collaboration between Spirion and Infolock enables organizations to fully catalog, classify, and control access, ensuring data security and integrity.
- 5. Long-Term Resilience:** Build a robust data security framework that grows with your business. The joint efforts of Spirion and Infolock protect your current assets and prepares you for future security challenges, fostering long-term protection and stability.

Solution Overview

This fully Managed Data Security Posture Management (DSPM) offering includes the implementation, configuration, integration, administration, and maintenance of Spirion's DSPM solution, designed to:

- Enhance an organization's data security capabilities without the complexity and overhead of managing tools, processes, or resources internally
- Align the organization's data protection needs with their desired business outcomes
- Optimize product integration and utilization by establishing data use and product maturity
- Advocate and implement consolidation efforts where applicable

The partnership ensures sensitive data is discovered, classified, and continuously monitored — both in the cloud and in hybrid environments — against external and internal threat vectors, bad actors, accidental loss, and malicious compromise, fortifying the organization's data security posture over the long term. Organizations achieve long-term data security protection, proper technology-use according to best practices, and subject matter expertise fulfillment.

Features

- Data Discovery and Classification
- Continuous Risk Assessment, Prioritization, and Planning
- Ongoing Risk Remediation w/ Expert Fine-tuning
- Assessment of current state data management and protection capabilities
- Product Maturity Planning and Implementation
- Assistance with Establishment of Data Governance Program
- Development of Annual Plan that aligns data risk management with desired business outcomes
- Operational Support
- Product Integration and Optimization

Designated Resources

- Customer Success Manager
- Spirion-certified Technical Expert

Why Choose This Partnership?

Challenge	Solution
Unsure where the organization's most important data resides	Fully catalogs and understands duplicate, stale, or sensitive data assets across the data estate
Lack a full inventory across the organization's digital estate, complete with data context	Provides comprehensive data context, enabling teams to make informed decisions regarding access, sharing, and collaboration
Lack visibility into organization's internal and external data access, including where access may be over-permissive or out-of-date	Establishes who has access to the organization's data and why (what is their intent?)
Lack business outcome alignment	Aligns the organization's data security needs and business outcomes
Lack product integration due to disparate technologies and immature product utilization	Optimizes product integration and utilization

Outcomes

- Autonomously discover sensitive data without tuning rules or detection
 - Fully enable and support DLP controls with data classification and access governance insights
 - Support Zero Trust / SASE architectures with a “data-first” foundation
 - Proper technology-use according to best practices
 - Long-term data security resilience
-

ABOUT SPIRION

In a world that relies more and more on data, understanding and protecting it is crucial. That’s why at Spirion, we’re dedicated to helping organizations around the world protect their most sensitive information. Our mission is clear: deliver unmatched 98.5% accuracy in discovering personal, sensitive, and regulated data — no matter where it lives— and provide actionable analytics for superior visibility and measurement to protect at-risk and vital data.
